

Axesstel in action.

A rural school district needed a way to keep its students connected to the Internet and keep costs under control. In the past, the district had paid for a cable Internet connection for every desktop computer, but that was becoming too expensive to maintain. After meeting with Axesstel, the district installed MV440 CDMA 1xEV-DO Rev. A Gateways throughout the district. Each MV440 has the ability to connect up to four devices, enabling the district to consolidate its Internet connections. The MV440s also provided each school with ubiquitous Wi-Fi coverage for mobile devices and notebooks. Now, the district provides each student with Internet access and saves money, too.

COMPANY OVERVIEW

Axesstel is a leading provider of fixed wireless voice and broadband access solutions, including landline replacement, voice/data terminals, and broadband 3G and Voice over IP (VoIP) gateways to the worldwide telecommunications market.

SOLUTION DESCRIPTION

Axesstel's MV440 Wi-Fi Broadband Gateway delivers reliability that enables users to have Internet access anywhere on the Verizon Wireless Mobile Broadband network. The Gateway's four-port Ethernet switch provides a plug-and-play solution for networking multiple notebooks and desktops. Its integrated 802.11b/g Wi-Fi router enables wireless broadband data access in remote locations, as well as trouble-free setup of a local hotspot.

TOP REASONS TO BUY

- + Attracts new subscribers in areas where towers exist that are not serviced adequately by DSL, cable, or satellite options.
- + Provides wire-free Internet access virtually anywhere.
- + Creates a SOHO—or a public—hotspot with connectivity to printers, gaming consoles, and other devices without Wi-Fi.

CUSTOMER SEGMENTS

- + Mid-enterprise (100 to 1,000 employees)
- + SMB (25 to 100 employees)
- + SOHO (1 to 25 employees)

PLATFORM SUPPORTED

- + Embedded
