

Corporate Profile

Overview

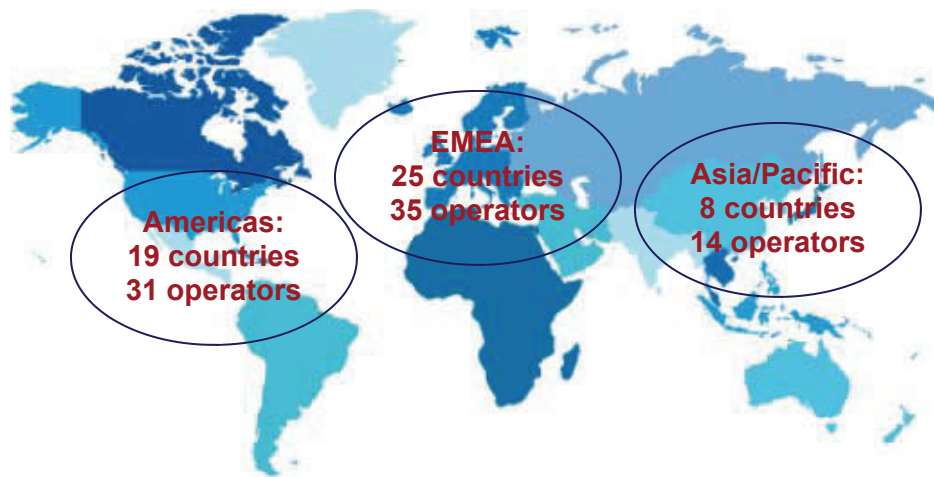

Axesstel, Inc. (OTCBB:AXST) is a recognized leader in the design and development of fixed wireless voice and broadband data products that increase speed, mobility and connection. The company delivers innovative fixed wireless solutions to leading telecommunications operators and distributors in developing countries worldwide. It is building relationships with the Tier One, Two and Three operators and distributors in North America to supply these markets with fixed wireless solutions to compete for voice and data wire line business in new ways. Axesstel's best in class product portfolio includes broadband modems, 3G gateways, machine-to-machine security alarm systems, voice/data terminals, fixed wireless desktop phones, and public call office phones for high-speed data and voice calling services.

Corporate Structure

Founded in July 2000 and headquartered in San Diego, California, Axesstel has operations in Seoul, South Korea and Shanghai, China and outsources volume manufacturing in mainland China as well as to other partners around the world.

Customers

Axesstel's customer base includes leading global telecommunications operators, infrastructure providers, OEM partnerships and distributors in emerging and developed markets around the globe. At Dec. 31, 2009 Axesstel served 80 operators in 52 countries worldwide.

Market Opportunities

Developed Regions: Axesstel is expanding its footprint in North America by certifying its data and voice devices to run on Tier 1 wireless networks through initiatives such as the Verizon Open Development Program. Axesstel's devices provide ideal solutions for wireless operators to drive new revenue streams from their network investments.

Emerging Market Voice & Data Opportunities: In June 2008, Gartner published research data forecasting very strong compound annual growth rates for wireless modem sales in Axesstel's target markets. According to the data, the compound annual growth rate for Africa is expected to be 45%, in Asia Pacific is 48%, in Latin America is 20%, and in the Middle East is 23%.

Advanced Data Opportunities: By 2010, WCDMA and HSXPA are expected to represent around 45 percent of total WCDMA cellular connections, exceeding GSM connections by the end of the decade. According to Berg Insight, Europe's mobile broadband connections will increase to 30 million by 2011.
