RAL10

Router Adapter

The RAL10 Router Adapter is designed for portable use. This device combines wired wide area networking (WAN) and wireless access. In one mode, the wired WAN mode, access is acquired through the RJ45 port. A USB printer can be connected via the USB port. Local devices can also be connected to a wireless local area network (WLAN) through Wi-Fi. In the other mode, the wireless 3G mode, a 3G modem plugged into the USB port allows several people to share high speed access to email, the Internet, data intensive files and multi-media streaming. Both the RJ45 port and Wi-Fi port can provide wired and wireless LAN access for local devices.

Features

- 802.11 b/g/n Wi-Fi Router
- 2 USB modes: Modem or Printer
- 3G mode connecting with 3G USB Dongle
- 1 RJ45 Ethernet port for ADSL/Broadband Cable
