- Humidity: 10 ~ 95%
- Rechargeable Battery
 - Stand-by time: Over 7 hours
 - Talk time: Over 1 hour

TX240G

CDMA Fixed Wireless Voice Terminal

The Axesstel TX240G is a dual-band (800/1900MHz) fixed wireless voice terminal that is perfect for consumers searching for a seamless POTS (Plain Old Telephone Service) line replacement service. The TX240G is designed to provide a simple, cost effective dial tone service at a home or business. Its Advanced Assisted GPS (AGPS) feature provides E911 service to accurately determine the location of the caller in case of an emergency. Axesstel's TX240G also allows the consumer to migrate from landline to wireless without losing any functionality of their regular home phone service.

Features

- CDMA2000 1X
- AGPS/E911 service
- Caller ID Type II with CNAM
- 3 Multi-color LED Indicators (Power, Mode and Signal)
- Dial-tone and DTMF generation
- Two RJ-11 ports (bridged) for connection to multiple devices
- Supports up to three phones (3 REN)
- Call waiting, Call forwarding and Three-way calling
- Black or White color available
- Wall mountable

Advanced Features

- Pre-programmed emergency numbers
- Metering pulse generation for payphone application
- Securities: Call restriction and Phone lock
- 1 minute alert, service alert and low battery alert
- TTY/TDD through RJ-11
- Voicemail notification
- Hot line (PLAR)
- OTA capable
